Solution

RISING INFLATION

Inflation refers to the rise in the price of the most goods and services of daily or common use such as food, clothing, housing etc.

A saying goes here:

“Money is power, freedom, a cushion, the root of all evils, the sum of blessing.”

(Carl Douglas)

Inflation is not an expected and unpredictable phenomenon. Its seed is sown because of malpractices, mismanagement, weak govt machinery, insufficient market knowledge, indifferent

attitude towards economic indicators, absence of check and balance. Disturbance in demand and supply ratio is yet another factor for the same.

Inflation is a menace in poor and underdeveloped countries. It badly increases poverty and decreases purchasing power. Growing price-hike slows down the economic system of the country and creates an alarming situation and imbalances market quite severely.

“If you buy things, you do not need, soon you will have to sell things you need.”

(The World’s richest investor Warren Buffet)

Rising inflation leads to joblessness. As a result, not only unskilled workers but also skilled workers have to lose their jobs. It also causes future social problems. Anxiety and depression are the immediate outcomes of price-hike. Uncontrollable inflation brings about dishonesty and corruption. It makes the rich richer and the poor poorer. It may be called a social stigma that leads to dissatisfaction among all the sections of society.

As an individual, we must play our part by avoiding lavish and glittering lifestyle since overspending is considered to be a crime against society and increasing birth rate as well as imposition of taxes on essential commodities to be seriously checked by the responsible in order to drive the country out of this damaging threat.

Corruption in Pakistan

Corruption is a word that has occupied a big place in all kinds of media these days in our country. It means dishonest, illegal, or immoral behavior, specially from someone with power.

Corruption is a vital issue that has badly been affecting our country's economy. It not only holds the economy from reaching a new height but also allows us the uncontrollable malpractices to further increase.

A study conducted by Transparency International recorded that more than 92 percent of Pakistanis have some point or other pay bribe to a public official to get a job done. According to a World survey, our country ranks 135 place out of 180 countries in this respect.

There are several causes of malpractices in our country like "low salary" as it is a human nature to have everything more and more whether it goes surplus from their present need. "Lack of accountability and regulations" which encourages people to evade taxes. Thus, government is not able to perform development projects as required. Our law enforcers let criminals go after under hand deal for their own financial benefits. Judiciary in Pakistan is seen notoriously inefficient and corrupt as per international survey report, creating a big black spot on the face of our country internationally.

Now, we need to take strict actions on war footing basis in order to clean our country from this growing menace whether we have got to pay a heavy price as nothing more important than the better image and dignity of our homeland, following the example of the countries like Singapore, Denmark and Japan where justice system is robust.

Although there are no adequate means to prevent corruption or punish law breakers on malpractices, a proper mechanism may be introduced which is made equal for all, even the ruling class of the country as well.

"Corruption is paid by the poor" Pop Francis
